
GAN critic: 250 critic-update rolling means; five critic updates per OM4 generator update
Critic input-gradient norm
GP target = 1
Generator optimizer updates
Critic scores and their shared offset
Generated pair
Real/generated pair
Common score offset
Generator optimizer updates
Critic objective contributions
Fake − mixed score
10 × gradient penalty
0.001 × drift
Generator optimizer updates
Mixed − fake score gap (offset cancels)
Generator optimizer updates
